

# Honours Project (GA)

---

MHW226542

Video Presentation information session

# Main project stages

# Nature of the presentation

- Student-created video
- Should give a succinct overview of the aim of the project and the outcomes
- Should be possible for a technically-aware viewer who is not familiar with your work to understand what you have achieved in your project
- Outcomes include the artefact which was implemented and the conclusions drawn

# Demonstration

- If possible you should include some kind of demonstration of the artefact you have implemented
- May be constrained by the nature of your artefact or workplace restrictions
- Check with your mentor what you can show!
- Audience will only be markers and External Examiner
- Examples of possible demonstrations:
  - Screen recording of “live” interactive demonstration of functionality
  - Screenshots illustrating functionality
  - Data from log files
  - Etc.

# Software

- For recording of interactive demos you will need some kind of screencast software
- See suggestions on GCU Learn
- If interactive demo recording is not possible for you, you will probably be able to use Powerpoint narration and export as video

# Format

- Video format should be MP4
- Presentation should be limited to 10 minutes
- Plan carefully to make sure that you cover the points that you want to show in a clear, coherent way
- Presentation structure should map clearly to the content of your final report
- For example, it should start with a clear Introduction/purpose, explain the artefact, and then the evaluation/conclusion

# Marking

- The demonstration will be awarded a mark out of 100, as follows
- Rubric will be available in GCU Learn assignment

<b>Introduction to the project and the artefact</b>	<b>20 marks</b>
<b>Clear and comprehensive demonstration and/or description of artefact</b>	40 marks
<b>Description of how the Demonstration is related to project findings</b>	20 marks
<b>Presentation Talk Quality</b>	20 marks

# Submission

- Assignment submission link will be in Assignments area in GCU Learn
- Submission will be done using Planet eStream
- Instructions will be available as a document along with the submission link
- Submission date : **Friday 18th August**

# Presentation Documentation

- Documentation available in GCU Learn
- **Video presentation guidance** – includes marking scheme
- **Video presentation submission information**
- **Possible software for screen-recording**

# Questions?
